UNITED STATES ENVIRONMENTAL PROTECTION AGENCY

DATE: July 8, 1980

SUBJECT: Hazardous Waste Site Inspections

FROM: John S. Frisco, Acting Chief  
Hazardous Waste Site Program

TO: Richard D. Spear, Chief  
Surveillance & Monitoring Branch

*Interstate  
concentrating*

Attached are preliminary assessments and related information for those hazardous waste sites on the attached list. Also indicated is the priority ranking assigned to each site by my staff. Since the designated rankings no longer have the benefit of review by committee, they are considered preliminary and subject to change pending the results of site inspections and other subsequent actions.

As previously discussed, I am including sites in New Jersey which have been inspected by the Department of Environmental Protection (DEP) but where the 10-page inspection report forms are not available. Where DEP has filled out the EPA forms, further investigation by your staff will not be necessary unless sampling is required in connection with an enforcement action at a particular site. You are aware that a grant under TSCA has been awarded to DEP for assessment of hazardous waste sites in New Jersey. A condition of this grant will insure that all future DEP inspection reports utilize the EPA forms.

Together with Enforcement Division staff, we will continue in our efforts to obtain a working relationship with New York concerning the sharing of hazardous waste sites in that state and also refine the list of sites for which EPA has responsibility under our partnership agreement with New Jersey. This will enable us to place our inspection priorities at those sites with EPA involvement.

Please schedule field inspections as appropriate and return the inspection reports to me for evaluation and input to the national hazardous waste site tracking system. Where you believe our initial priorities should be revised, please indicate or notify me so that this information can be added to the ADP tracking system.

If you have any questions, do not hesitate to contact me.
